---

**GROUP**

For over sixty-five years, Lab Aurelia has been the specialist polyclinic par excellence in Rome, offering users a fast, efficient, qualified service, attentive to customer needs. Our laboratory has state-of-the-art machinery in accordance with European quality standards (ISO 9001:2015 certification) both for radiology and laboratory diagnostics.

At our center it is possible to carry out laboratory and radiology tests both privately and in agreement with the National Health System (SSN). What has always characterized our center is the protection of the patient, to build together a path of prevention and treatment at 360° in all fields of diagnostics.

\_ NEW HEADQUARTERS  
VIA BAGLIVI, 8 \_ ROME

Since December 2022 LABAURELIA srl has acquired the prestigious **Baglivi Diagnostic Study**, combining skills and know-how to provide all its customers with top-level healthcare services.

A **modern private health facility**, with services that offer the best technology and medical knowledge, to meet the patient's expectations with the commitment of **latest generation technological resources** to obtain the best diagnostic results.

The **new headquarters in Via Giorgio Baglivi, 8** in Rome it already offers a wide range of diagnostic imaging tests from traditional radiology to ultrasound, breast and MOC, as well as specialist surgery, dermatology and gynecology visits. New services and new specialist visits will be activated soon.

The health management of the site is entrusted to Dr. Stefano Cerza and the technical management of Radiology is entrusted to Prof. Giuseppe Panzironi, former professor of Radiodiagnostics at the University "La Sapienza" of Rome and at the Department of Radiological Sciences at the Policlinico Umberto I.

#### BAGLIVI HEADQUARTERS SERVICES

#### **DIGITAL RADIOLOGY AND PEDIATRIC RADIOLOGY:**

TRADITIONAL RADIOLOGY of all organs and systems  
THORACIC RADIOLOGY  
OSTEOARTICULAR RADIOLOGY  
DIGESTIVE TUBE RADIOLOGY  
PEDIATRIC RADIOLOGY

Bone Densitometry (MOC) and Vertebral Morphometry (VFA) with DXA technique

#### **BREAST:**

**MAMMOGRAPHY with 3D TOMOSYNTHESIS and BREAST ULTRASOUND**

Breast specialist visits  
Ultrasound-Echocolor Doppler

#### **ULTRASOUND LIST:**

WHOLE ABDOMINAL ULTRASOUND  
UPPER ABDOMINAL ULTRASOUND  
LOWER ABDOMINAL ULTRASOUND  
LIVER AND BILE TRACT ULTRASOUND  
PANCREATIC ULTRASOUND  
ABDOMINAL AORTA ULTRASOUND with COLOR DOPPLER  
RENAL ULTRASOUND, COLOR DOPPLER  
RENAL ARTERIES

\_ NEW HEADQUARTERS  
VIA BAGLIVI, 8 \_ ROME

SUPRAPUBIC PELVIC ULTRASOUND  
TRANSVAGINAL PELVIC ULTRASOUND  
BREAST ULTRASOUND  
THYROID AND PARATHYROID ULTRASOUND WITH COLOR DOPPLER  
AND ELASTOGRAPHY  
ULTRASOUND AND SCROTAL ECHOCOLORDOPPLER  
SOFT TISSUE ULTRASOUND  
TRANSRECTAL PROSTATE ULTRASOUND

## \_ THE LAB OF ANALYSIS

### OUR EXAMS

- CHEMICAL-CLINICAL
- IMMUNOHEMATOLOGY
- BACTERIOLOGY
- HORMON DOSAGES
- PRIST AND RAST FOOD INTOLERANCES
- TUMOR MARKERS
- CYTOLOGICAL EXAMINATIONS
- INFECTOLOGY
- IMMUNOCOMPATIBILITY
- OCCUPATIONAL MEDICINE
- COUPLE INFERTILITY EXAMS
- MOLECULAR BIOLOGY AND MOLECULAR GENETICS

#### CLINICAL CHEMISTRY

It is a branch of laboratory medicine that deals with the study of biochemical alterations of a pathological nature and with the application of chemical-instrumental and immunochemical analytical techniques to carry out diagnostic or routine determinations on biological fluids.

#### IMMUNOHEMATOLOGY

Immuno-haematology treats blood diseases related to alterations of the immune system when the body reacts against its own tissues and/or organs.

#### BACTERIOLOGY

Medical bacteriology is a branch of microbiology that studies bacteria in relation to the diseases that can derive from them.

#### HORMON DOSAGES

Hormonal dosages allow you to measure the amount of hormones present in the blood, to determine if the glands that produce them (pituitary, thyroid, etc.) are working properly, thus identifying possible hormonal imbalances.

## IMMUNOCOMPATIBILITY

The HLA system comprises a complex of blood group and tissue antigens, encoded by a series of genes located on the short arm of chromosome 6. Experimental observation reveals that these antigens are responsible for a series of humoral and cellular reactions which lead to rejection of a transplant, hence their identification as "histocompatibility" antigens.

## PRIST AND RAST

Blood tests useful to highlight an allergy and to try to identify which specific substance you are allergic to. Today at our center it is possible to perform Alex 2 which also provides an alternative diet to food intolerances to specific molecules.

## TUMOR MARKERS

They are substances found in the blood, urine or cellular tissues that present a significant increase in their concentration in some types of neoplasms. A high level of Tumor Markers can therefore indicate the development of a cancer, even if there may be other causes for an increase in these values.

## CYTOLOGICAL EXAMINATIONS

It consists in the optical microscope observation of cells taken or naturally exfoliated from the various organs or tissues of our body. The cells thus collected must be pairs. Medically accurate fertilization techniques "fixed" at the time of sampling and subsequently colored in the laboratory to make them visible under the microscope.

## INFECTIVE EXAMINATIONS

These are analyzes to identify the presence or absence of viral forms in the body, or to monitor the effectiveness of a therapy through the identification of various antibodies present.

## OCCUPATIONAL MEDICINE

Medical branch specialized in the prevention of work-related risks.

## COUPLE INFERTILITY TESTS

It includes all diagnostic tests in order to identify the causes of a couple's failure to conceive a child. Therefore, the following are performed:

- **For her:**laboratory tests, genetic tests, vaginal swabs, pap smears, gynecological visits, ultrasounds and mammograms - mammography with tomosynthesis.
- **For him:**seminal fluid tests, sperm separation tests, DNA fragmentation tests, microbiology and virology tests on seminal fluid, genetic tests, hormonal tests, andrological examinations, urological examinations, testicular eco-color Doppler. Genetic counseling for infertility assisted.

## \_ MOLECULAR BIOLOGY AND MOLECULAR GENETICS

It is a branch of biology that deals with the molecular mechanisms underlying life. Through sophisticated techniques it is possible to amplify the DNA in order to identify genetic mutations that cause a lack of functionality of that same gene being investigated. This technique makes it possible to diagnose numerous pathologies of genetic origin, paternity tests, prenatal diagnosis tests, molecular oncology, pharmacogenetics, female infertility, cardiovascular pathologies, male infertility, nutrigenetics, molecular infectiology, cytogenetic tests.

### MOLECULAR ONCOLOGY

Application of molecular techniques for the diagnosis of neoplastic diseases. Molecular diagnosis of neoplasms by DNA analysis is conducted on biological samples such as urine, feces, sputum, vaginal swab, and blood samples.

### NUTRIGENETIC

It is a new discipline that combines the consolidated knowledge of nutrition, physiology, biochemistry, with the new discoveries in the field of genetics and molecular biology. With nutrigenetics it is possible to develop a personalized nutrition to the genetic constitution of the individual.

### Pharmacogenetics

It is a young and rapidly evolving discipline whose starting point is the study of individual differences in response to drugs. In fact, depending on one's genetic make-up, each subject will have a certain reaction deriving from the intake of a given medicine.

### PATERNITY INVESTIGATIONS

It is done to establish paternity by comparing DNA.

### CARDIOVASCULAR DISEASES

Cardiovascular diseases are a group of diseases affecting the heart and/or blood vessels. These represent one of the leading causes of death in industrialized countries. The identification of genetic abnormalities that can cause them is important for prevention.

### MOLECULAR INFECTIOLOGY

Molecular infectiology is the branch that deals with the molecular diagnosis of viral, bacterial, and parasitic infections by gene amplification (PCR).

## \_ GENETIC CONSULTANCY \_ PRENATAL DIAGNOSIS

At our facility it is possible to perform non-invasive prenatal diagnostic tests.

**CLINICAL ACTIVITY IN THE GENETIC FIELD** *First and second level medical genetics consultations.*

*Preconception consultations*

*Genetic counseling in oncology Counseling for infertility and repeated miscarriage Explanatory counseling for pre-implantation genetic diagnosis and pre-conception*

*Explanatory consultancy for genetic tests Family studies with reconstruction of the family tree for hereditary genetic diseases*

All medical genetics consultations are carried out in collaboration with a team of psychologists with the prior authorization of the patient.

**PrenatalSAFE®** is a non-invasive prenatal test that analyzes circulating free fetal DNA isolated from a sample of maternal blood. PrenatalSAFE® provides 8 levels of detail, thanks to which it is possible to obtain the most complete information framework on pregnancy available today.

**PrenatalSAFE®** it allows you to verify the presence of aneuploidies and microdeletion syndromes, from the most common to the rarest, of structural alterations in all the chromosomes of the fetus and

to identify mutations related to serious genetic pathologies. PrenatalSAFE® Karyo is the most technologically advanced non-invasive prenatal test currently available. By analyzing free fetal DNA (cfDNA) circulating in maternal blood. PrenatalSAFE® Karyo detects aneuploidies, fetal structural chromosomal alterations affecting each chromosome and serious genetic diseases.

**PRENATALSAFE® KARYO PLUS** PrenatalSAFE® Karyo Plus highlights 95.5% of fetal chromosomal anomalies detectable in the prenatal period, and 99.1% of those found at birth, reaching a level of detection rate very similar to that of the traditional fetal karyotype (96.9%) and molecular (99.8%), obtained through invasive prenatal diagnostic techniques.

\_ GENETIC CONSULTANCY  
\_ PRENATAL DIAGNOSIS

### GENESAFE™

Combined with PrenatalSAFE tests®Karyo PLus provides the highest level of pregnancy information.

It is performed through the study of cfDNA, by taking a blood sample from the pregnant woman with a gestational age of at least 10 weeks. The cfDNA is isolated from the plasma component of maternal blood.

Subsequently, bioinformatics is carried out to detect mutations due to a specific genetic disease, using the innovative technology called

### Next Generation Sequencing (NGS).

### PRENATALSAFE® COMPLETE

It also detects mutations that can arise randomly in the fetus.

Version also available "PLUS" for the identification of the 9 most common microdeletion syndromes, it provides the most in-depth level of information obtainable in pregnancy using non-invasive prenatal screening tests.

**PRENATALSAFE®KARYO PLUS + GENESAFE™  
= PRENATALSAFE® COMPLETE**

### PRENATAL ADVANCE GENETICS

It is a technologically advanced latest generation non-invasive prenatal test (NIPT) which, by analyzing the free fetal DNA (cfDNA) from a blood sample of the pregnant woman starting from the 10th week of pregnancy, allows to identify in the fetus: aneuploidies, structural chromosomal alterations (deletions and duplications) affecting each chromosome of the fetal karyotype;

50 microdeletion/microduplication syndromes; 79 serious genetic diseases, of which: 26 with hereditary transmission and 53 with de novo onset

## \_ COUPLE INFERTILITY

The difficulty of having children is a widespread problem in the Italian population with an incidence of about 15%. Providing information on couple infertility represents an educational path made up of specialist figures who offer help to all those who are looking for a pregnancy, but find themselves unable to conceive.

At our center you can perform:

- Free consultations for the evaluation of couple infertility problems with the formulation of a guided and therapeutic path towards medically assisted fertilization techniques, Insemination, ICSI, IVF, Gamete Freezing, Embryo Freezing, Heterologous Fertilization.

### COUPLE INFERTILITY CHECK-UP

(to meet your economic needs, we offer the possibility of performing a large amount of preparatory exams for medically assisted procreation techniques at a more than advantageous price

### FEMALE FERTILITY CHECK-UP (PLUS)

Fsh- Lh- Estradiol - Amh-Prolactin  
Gynecological visit with Pap Test  
Swab for Chlamydia - Swab for Mycoplasma  
Mutation buffer Thrombophilia, Cystic Fibrosis  
Karyotype - Hysterosalpingography  
Breast Ultrasound - Mammography  
PRICE €1,190

### FEMALE FERTILITY CHECK-UP

(BASIC)

Fsh - Lh - Estradiol - Amh - Prolactin -  
Gynecological examination with swab for Chlamydia  
- Mycoplasma - PCR . PAP test.  
PRICE €300

### MALE FERTILITY CHECK-UP

Fsh - lh -  
testosterone - Spermogram  
Spermioculture - Karyotype - Ultrasound -  
Testicular Doppler ultrasound  
PRICE €300

### SCREENING SEMINAL FLUID EXAMINATION

Same-day reporting - Consulting  
PRICE €75

### DNA TEST THE NEW FRONTIER

Anti-aging and Regenerative Medicine is an advanced form of preventive medicine and biomedical technologies that refers directly to the four mother sciences: physics, mathematics, chemistry and biology, integrating various disciplines including food science, physiology, sports medicine, biochemistry, molecular biology, genetics, endocrinology, dermatology, psychoneuroimmunology, for to promote lengthening of life in health and efficiency by preventing degenerative diseases and delaying the aging process by improving and lengthening the time that separates each woman from menopause. Regenerative medicine also finds application in the complex female world by delaying the symptoms of menopause.

- ANTIAGING**
- COL 1 skin elasticity
  - MMP1 skin elasticity
  - AQP1 skin hydration status
  - FLG keratinization
  - SOD1 oxidative stress
  - MC1R skin sensitivity to the sun
  - TNF-ALFA inflammatory state
  - VDR FOLK cytoprotection
  - VDR BSML cytoprotection
  - VDR TqI cytoprotection
  - MTHFR vasculature
  - TFAP2B localized adiposity

**2023**

## LAB AURELIA MEDICAL BEAUTY

The team of Doctors of the "Lab Aurelia Medical B highly qualified and specialized in Ch Aesthetic Medicine.

We offer treatments in an environment of high quality and with maximum safety, competence and seriousness.

Lab Aurelia Medical B plastic surgeons will evaluate with a first visit the need for treatments to be carried out in order to correct imperfections and improve every aspect of your body, operating only in case of real need, and establishing a therapy targeted and accurate by evaluating a personalized and highly studied diagnostic path aimed at improving every aspect of the face and body.

## \_ AESTHETIC MEDICINE

### **The treatments that can be performed are:**

- Facial treatment with botulinum toxin
- Facial volumizing treatment with hyaluronic acid
- Bio-revitalizing volumizing facial treatment with radiesse
- Treatment of the lips with hyaluronic acid  
(volumizing/remodeling treatment of the lips)
- Biorevitalizing facial treatment
- Hyaluronic acid
- Biorevitalization with PDO threads
- Soft face lifting with traction filters
- Peeling (various formulations)
- PRP infiltrations (growth factors) hair / face
- Lipofiling (FULL FACE OR ZONE)
- Face And Body Radiofrequency
- Body Cavitation
- Mix Cavitation and Body Radiofrequency
- Rvm Body
- Face electroporation
- Face+Neck photorejuvenation
- Hands photorejuvenation
- Ipl Vascular
- Ipl for Hyperpigmentation
- Ipl for Face and Body Epilation
- Diode 808 laser for face and body hair removal
- Facial Moisturizing Treatments

## \_ STAFF

### **LAB AURELIA MEDICAL BEAUTY**

Dr. Gabriella Gentili  
Dr. Elisabetta Fabiani  
Dr. Daniela Masia  
Dr. Silvana Manni

All together to give you  
all possible services  
of aesthetic medicine in Rome.

**Great professionals united  
in an outstanding TEAM  
only for LAB AURELIA.**

Call for information.  
We are open every day  
of the week,  
Ms Chiara Rossetti  
Tel. 06 66000543  
Cell. 392 3164034.

## \_ SPORTS MEDICINE

Dr. Vincenzo Sartoriello

Sports medicine is a branch of medicine that deals with sport, physical exercise and related pathologies, also at a preventive level.

Sports medicine has now assumed an indispensable role in the preparation of professional athletes who often have a highly sophisticated medical staff, made up not only of the sports doctor, but also of dieticians, psychologists, physiotherapists and orthopedists.

At our center you can perform:

- sports doctor visit for competitive authorisation
- sports doctor visit

From the untrained individual who chooses a healthy and active life to the athlete who wants to obtain ever better results, the medical-sports visit at LABAURELIA represents the reference of excellence, by virtue of adherence to scientific criteria and the work of team of Sports Doctor, Nutritionist, Posturologist, Physiotherapist and Athletic Trainer

### PERFORMANCE

### SPORTS MEDICINE

- Certificate of fitness for competitions

- Certificate of non-competitive and non-competitive "Plus" fitness
  - Certificate of competitive fitness over 39 years
- CARDIOLOGY AND FUNCTIONAL EVALUATION IN SPORT
- One-two-dimensional echocardiogram and color Doppler
  - Maximal exercise test
  - Dynamic ECG according to 24-hour Holter
  - Evaluation of maximum O<sub>2</sub> consumption (VO<sub>2</sub> MAX)
  - Evaluation of the anaerobic threshold
  - Incremental test with evaluation of lactic acid
  - Specific tests for different sports disciplines

## \_ RADIOLOGY

Dr. Maria Luisa De Ciccio

The LAB AURELIA POLIAMBULATORY is one of the most sophisticated centers in the field of **DIAGNOSTICS BY IMAGES**. An excellent staff follows the patient from the beginning to the end of the exam with the help of state-of-the-art machinery. Our center is accredited with the national health system for the laboratory and limited to classic radiology.

### **At our center you can perform:**

- Cone-Beam CT Volumetric Dental 3D
- Mammography with Tomosynthesis
- Lumbar and femoral moc
- Moc Total Body
- Lumbar and femoral moc with TBS
- Moc and Dexa Morphometry
- Radial moc
- Orthopantomogram
- Open sector magnetic resonance
- Pelvic/transvaginal ultrasound
- Obstetric and morphological ultrasound
- Bladder ultrasound
- Transrectal prostate ultrasound

- Liver ultrasound
- Pancreatic ultrasound
- Renal ultrasound
- Splenic ultrasound
- Abdominal aorta ultrasound
- Testicular Echocolor Doppler
- Echocolor Doppler epiaortic vessels
- Telecranium
- Skeletal muscle ultrasound

## \_PEDIATRIC CENTER

Lab Aurelia srl has developed a Pediatric Specialist Diagnostic Service to support the family pediatrician and to lighten the public's waiting times in order to offer our patients (0-18 years) a wide range of services.

In fact, in our pediatric centre, as a support to the family pediatrician, it is possible to perform instrumental tests and specialist visits.

We also have a wide range of packages and checkups available for new mothers and we try to provide assistance at 360° starting from prenatal diagnosis up to growth and development.

Every new mother needs a pediatrician of reference who accompanies the development of her child from the early stages of life up to pre-adolescence, the figure of the pediatrician is very important especially at the beginning when you need to ask or ask doubts several times reports to fevers colds, but also colic sleep problems and weaning.

At our pediatric centre, coordinated by Dr. Alfredo Gro, a specialist in neonatology and pediatrics, we give our customers the opportunity to have a reference figure even in the private sphere to whom they can go in case of need.

Our new **PEDIATRIC CENTER** provides the possibility to use the following services:

- **PEDIATRIC VISIT**
- **PEDIATRIC CARDIOLOGY**
- **EYE EXAMINATION**
- **ORTHOPEDIC VISIT**
- **DERMATOLOGICAL EXAMINATION**
- **ENT EXAMINATION**
- **ALLERGOLOGICAL VISIT**
- **NUTRITIONAL VISIT**
- **DIABETES EXAMINATION (OVER 14 YEARS OLD)**
- **ULTRASOUND OF THE HIPS**
- **( EVEN IN THE FIRST 3 MONTHS )**
- **BLOOD SAMPLES / MICROBIOLOGY**
- **PEDIATRIC COVID SWAB**

For info on costs and reservations, contact the desk or call **06/66000543**

Lab Aurelia wants to give concrete support to its customers but above all to our young patients, children.

Given the great difficulties due to the impact that Covid has had on public structures and given the very long waiting lists, we have decided to meet our little friends by offering our help and professionalism.

Tell us your story, we will treat your story with the utmost confidentiality and discretion and every month we will select a story that has particularly impressed us and we will do our best to help that child.

## \_ SCREENING E PREVENTION

### CHECK UP

The term Prevention is usually used to highlight two different concepts, which are, on the one hand, the adoption of correct lifestyle rules, on the other, the control of all those factors that can give rise to the appearance or progression of pathologies in so as to be able to intervene in good time to reduce its severity.

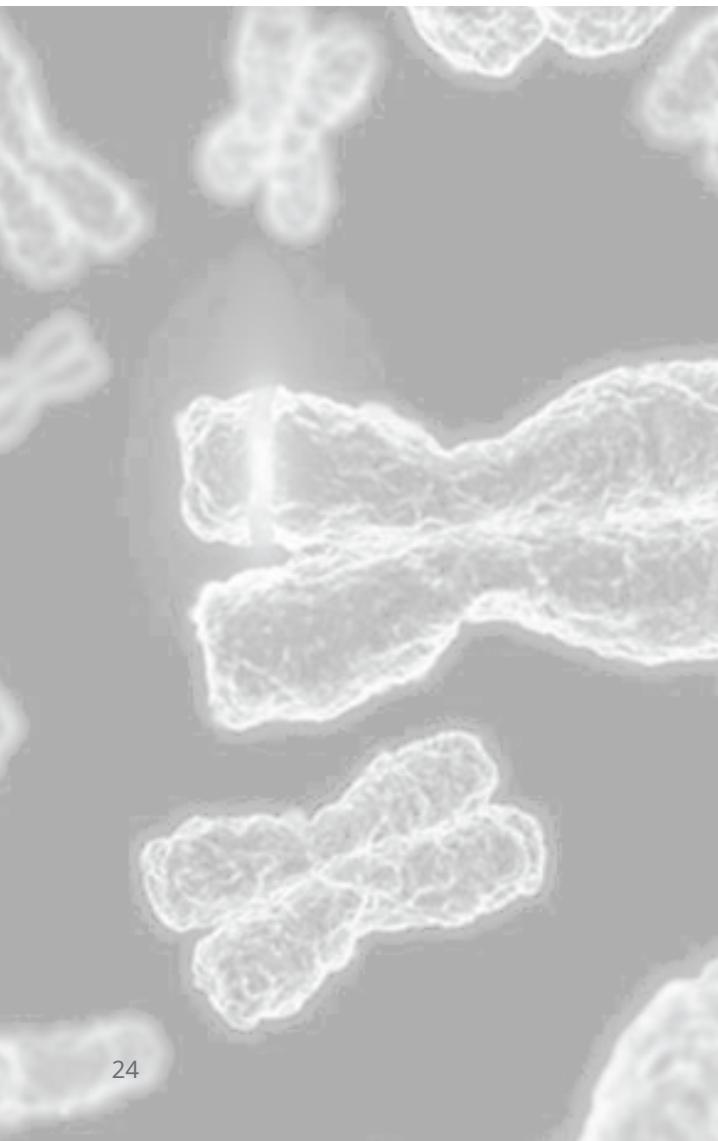

The Lab Aurelia srl in order to contribute to the prevention work that everyone can conveniently implement and in line with the progress of scientific knowledge, has created an innovative checkup project reserved for private customers.

This Service has also been conceived in such a way as to allow the customer not only a considerable reduction in time in carrying out the proposed health protocols, but also significant economic savings.

The project "**INTELLIGENT CHECK-UP**" consists in proposing in an articulated way diagnostic protocols aimed at an effective control of the state of health.

The protocols offered can be further customized according to the possible needs of the individual user in conjunction with the Doctor Coordinator of the Service. This in order to better assess its current conditions and the risks it actually runs.

At the end of the check-up with a final visit for the interpretation of the reports, together with the results of the diagnostic tests carried out, the patient is given a final medical report drawn up by the Coordinating Doctor. The service is aimed not only at individual users but also at public and private entities and is offered at discounted private rates.

### WOMAN UNDER THE AGE OF 40 Blood

count with formula	Ac anti Tg
Glycemia	Anti-TPO antibodies
Total cholesterol	Fsh
hdl cholesterol	LH extension
LDL cholesterol	Estradiol
Transaminases	Prolactin
oxaloacetic	Protidogram
Pyruvic transaminase	Thyroid Doppler ultrasound.
GT range	Pelvic ultrasound
Triglycerides	ECG
Potassium	Breast ultrasound
Azotemia	bilateral
Serum creatinine	Gynecological examination
Urine examination	hpv swab
TSH	PAP test
ft4	<b>TOTAL €500</b>

*Final final visit with reporting on the same day*

### WOMAN OVER 40 YEARS OF AGE

Blood count with formula	anti-TG antibodies
Glycemia	Fsh
Total cholesterol	LH extension
hdl cholesterol	Prolactin
LDL cholesterol	Vitamin D
Pyruvic transaminase	Protidogram
Transaminases	Occult blood
oxaloacetic	Echocolor Doppler
GT range	Thyroid
Triglycerides	ECG
Potassium	Breast ultrasound
Football	Bilateral
Azotemia	Mammography
Creatinine	with tomosynthesis
Uricemia	MOC (DEXA)
Urine examination	Gynecological examination
Tsh	Buffer + PV
ft4	+ PAP Test
Anti-TPO antibodies	<b>TOTAL €550</b>

*Final final visit with reporting on the same day*

### MAN UNDER THE AGE OF 40 Blood

count with formula	Serum creatinine
Glycemia	Urine examination
Total cholesterol	TSH
HDL cholesterol	FT4
LDL cholesterol	Ac anti Tg
Transaminases	Anti-TPO antibodies
oxaloacetic	Total testosterone
Pyruvic transaminase	ECG
GT range	Ecocolor Doppler
Triglycerides	testicular
Potassium	<b>TOTAL €250</b>
Azotemia	

*Final final visit with reporting on the same day*

### MAN OVER 40 YEARS OF AGE Blood

count with formula	TSH
Glycemia	FT4
Total cholesterol	Ac anti Tg
HDL cholesterol	Anti-TPO antibodies
LDL cholesterol	Total testosterone
Transaminases	PSA+ PSA FREE
oxaloacetic	Occult blood
Pyruvic transaminase	Abdomen ultrasound
GT range	business suit
Triglycerides	Ecocolor Doppler vases
Potassium	epiaortic
Azotemia	Urological visit
Creatinine	Cardiological visit
Uricemia	ECG
Urine examination	<b>TOTAL €450</b>
Protidogram	

*Final final visit with reporting on the same day*

AFTER CARRYING OUT ALL CHECK-UPS IN ONE DAY, THERE WILL BE THE FINAL VISIT AND DELIVERY OF REPORTS.

## \_ SPECIALISTIC EXAMINATIONS

- ALLERGY
- ANDROLOGY
- ANGIOLOGY
- AUDIOLOGY
- CARDIOLOGY
- HAND SURGERY
- DIABETHOLOGY
- DERMATOLOGY / PODOLOGY
- HEMATOLOGY
- ENDOCRINOLOGY
- PHYSIATRIC
- GASTROENTEROLOGY
- GYNECOLOGY/OBTETRICS
- COUPLE INFERTILITY
- SPORTS MEDICINE
- OCCUPATIONAL MEDICINE
- AESTHETIC MEDICINE
- GENERAL MEDICINE
- NEUROLOGY
- EYE
- ONCOLOGY (IEO PARTNERSHIP)
- ORTHOPEDICS AND TRAUMATOLOGY
- ENT
- PEDIATRICS
- PNEUMOLOGY
- PODOLOGY
- RHEUMATOLOGY
- NUTRITION AND FOOD SCIENCES

### ALLERGY

Allergology is a branch of medicine that deals with the prevention, diagnosis and treatment of allergies, immune pathologies characterized by hypersensitivity to particular substances and related diseases.

At our center you can:

- Allergological visit, Prick Test - food for intolerances, cytotoxic test, Breath Test
- Rast various allergens, Patch test, Alex 2, specific IgE, total IgE
- Gluten intolerance

### ANDROLOGY AND UROLOGY

Andrology is the branch of medicine that focuses its interest on male health, with particular reference to the dysfunctions of the urogenital system. Urology is closely related to andrology. A branch that deals with pathologies affecting the genitourinary system, i.e. kidneys-ureters-vesicaprostate-and external male genital organs.

At our center you can:

- Spermogram with consultation and check of the report
- AIH sperm separation test
- DNA fragmentation test
- Microbiological and virological tests on semen
- Andrological views
- Urological visits
- Genetic testing
- Transrectal Prostatic Ultrasound
- Renal ultrasound
- Bladder ultrasound
- Testicular Echocolor Doppler
- Uroflowmetry

### ANGIOLOGY

Angiology deals with the study of the anatomy and pathologies affecting arterial, venous and lymphatic blood vessels.

At our center you can:

- Visit
- Ecocolordoppler lower limbs (venous and arterial)
- Ecocolor Doppler upper limbs
- Ecocolordoppler epiaortic vessels

### DERMATOLOGY/ AESTHETIC MEDICINE

Dermatology is the branch of medicine that deals with the skin and the tissues connected to it (hair, hair, nails, sweat glands, etc.). At our center it is possible to carry out:

- Mole mapping
- Keratosis removal
- Specific treatments for acute, chronic and allergic dermatitis, psoriasis, seborrheic dermatitis and dermatosis
- Diagnosis and treatment of sexually transmitted diseases
- Diagnosis and removal of warts, warts and other skin lesions.

### ENDOCRINOLOGY

Endocrinology is that branch of medicine

specialist that deals with the study of internal secretion glands, i.e. those in which the product is directly introduced into the blood.

At our center you can:

- Endocrinological visit
- Thyroid ultrasound
- Echocolordoppler thyroid
- Hormonal analysis for the thyroid

### GASTROENTEROLOGY AND NUTRITION SCIENCE

Gastroenterology is the branch of specialized medicine that deals with the study of diseases and disorders of the gastrointestinal tract.

At our center you can:

- Gastroenterological and Hepatological visit
- Visit with nutritionist for personalized diets
- Abdominal and digestive system ultrasound (stomach, duodenum and jejunal ileal loops)
- Rx of the digestive system
- H2 Breath test lactose, lactulose and glucose
- 13-C Urea test for Helicobacter Pylori
- Food intolerance test

Alex 2

### Ophthalmology

Ophthalmology is a branch of specialist medicine that studies diseases and defects of the visual system and includes all diagnostic investigations and related therapeutic interventions.

At our center you can:

- Eye examination
- Orthoptic visit
- Lacrimal lavage, tonometry, gonioscopy

### GYNECOLOGY/OBTETRICS

Gynecology deals with the physiology and pathologies inherent to the female genital system and all the other structures functionally connected to it.

At our center you can:

- Gynecological visit
- PAP test
- Vaginal swab for common germs
- Vaginal swab for chlamydia
- Search for hpv with typing
- Hormonal dosages with blood sampling
- Transvaginal ultrasound
- Follicular monitoring
- Videocolposcopy
- couple's infertility checkup

### CARDIOLOGY

Cardiology is the branch of internal medicine that studies the anatomo-functional and pathophysiological aspects of the heart and the cardiovascular system

At our center you can perform:

- Cardiological visit
- Electrocardiogram
- Electrocardiogram under stress
- Cardiac Holter
- Holter pressure
- Cardiac Echocardiocolor Doppler

**ENT/ AUDIOLOGY** Otorhinolaryngology is a branch of specialist medicine that deals with the prevention, medical treatment and treatment of diseases that can affect the ear, the upper aerodigestive tracts: that is, the nose, larynx, hypopharynx, nasopharynx, oropharynx, throat and neck.

At our center you can:

- Otorhinolaryngological visit
- Pure tone audiometric examination
- Impedance test
- Vestibular audio exam
- Polysomnography
- Fiberoptic laryngoscopy

### ORTHOPEDICS AND TRAUMATOLOGY

Orthopedics is the medical discipline that studies the locomotor system and its pathologies.

Orthopedic and Trauma specialists specialize in the diagnosis and treatment of both surgical and non-surgical problems of the locomotor system. It includes: bones, joints, ligaments, tendons, muscles, nerves. At our center you can:

- Orthopedic visits
- Infiltrations
- Infiltrations with growth factors
- Radiology services

### DIABETHOLOGY

Diabetology is a specialized branch that deals with the treatment of diabetes and its complications by following the patient and offering medical and specialist support to keep this pathology under control. At our center you can:

- Diabetic visits
- Diabetes screening
- Blood tests.

### PNEUMONOLOGY

Pulmonology is a discipline that deals with diseases related to the respiratory system.

At our center you can perform

- Specialist
- Spirometry
- Radiological examinations

### OCCUPATIONAL MEDICINE

Occupational medicine is the branch of medicine that deals with the prevention, diagnosis and treatment of diseases caused by exposure to risks due to work activities or present in the workplace. The goal of medicine

work is to safeguard the health and safety of the worker in the workplace, to prevent occupational diseases and to avoid any type of accident in the workplace, or to improve the psychophysical and social well-being of workers of all professions.

At our center it is possible to carry out according to the provisions of the regulation relating to the safety of workers DGLS. 81/08

- specialist visits for occupational medicine

### SENOLOGY

Senology is the branch of medicine that studies breast diseases

At our center you can:

- Breast visits
- Breast examinations performed by a breast-oncologist
- Digital mammography with tomosynthesis
- Breast ultrasound
- Left/right breast cytology
- Breast self-examination training

## OUR PACKAGES OF SCREENING

LabAurelia has created prevention packages for the well-being of the whole family:

- AUDIOLOGICAL SCREENING
- DIABETES SCREENING
- ENDOCRINOLOGICAL SCREENING
- GYNECOLOGICAL SCREENING
- OSTEOPOROSIS SCREENING
- BREAST SCREENING
- UROLOGICAL SCREENING
- VERTIGO SCREENING
- ORTHOPEDIC SCREENING

### DIABETES PREVENTION

Diabetes is an alteration resulting from a metabolic decrease in insulin activity. In particular, diabetes can be due to a reduced availability of this hormone, to an impediment to its normal action or to a combination of these two factors. A feature that is always present in diabetes mellitus is hyperglycemia, which, over time, tends to be associated with some complications of the blood vessels: macroangiopathy and microangiopathy (i.e. alterations in the circulation of small arterial vessels which are particularly evident in the retina, in the kidney and in the nerve), which is instead specific of the pathology.

### DIABETES SCREENING:

- ECG, Ecocolor Doppler, fundus, neurological VIS
- Price €160**

### THYROID PREVENTION

The thyroid is an uneven, median endocrine gland located in the anterior region of the neck. It is made up of two lobes, right and left, joined by a narrow bridge called the isthmus. Functionally it has two endocrine components: the first produces thyroid hormones (T3 and T4), the second calcitonin. The thyroid is a gland of fundamental importance for our physiology and periodically checking its functionality is essential for prevention.

### ENDOCRINOLOGICAL SCREENING:

- **Endocrinological visit Thyroid ultrasound**  
Exams ft3, ft4, tsh  
**Price €130**

### WOMEN'S PREVENTION

Our Laboratory pays great attention to the prevention of pathologies related to the female genital system and the breast. Among the most common pathologies affecting the female genital system we find vaginal candidiasis and HPV, better known as papillomavirus and considered one of the possible causes of cervical cancer. Our packages are designed for women who wish to have a diagnostic study with the security of competence and punctuality.

### BREAST SCREENING:

- **Breast ultrasound, mammography with tomosynthesis, breast examination** **Price €195**

### GYNECOLOGICAL SCREENING:

- **Gynecological visit, Pap smear, HPV swab** **Price €190**

### OSTEOPOROSIS PREVENTION

The word osteoporosis refers to a condition in which the skeleton is subject to loss of bone mass and strength caused by nutritional, metabolic or pathological factors. The skeleton is therefore subject to a greater risk of pathological fractures, following the decrease in bone density and changes in the microarchitecture of the bones.

### OSTEOPOROSIS SCREENING:

- **Endocrinological examination, lumbar and femoral Moc, vitamin D, creatinine** **Price €125**

## UROLOGICAL PREVENTION

Urology is a specialized medical and surgical branch that deals with pathologies affecting the genitourinary system, i.e. the kidneys, ureters, bladder, prostate and external male genitalia.

### UROLOGY SCREENING 1 :

• **Urological visit, prostate or bladder ultrasound, uroflowmetry**

**Price €150**

### UROLOGY SCREENING 2:

• **Urological examination, uroflowmetry, prostatic ultrasound**

**or bladder, Renal Ultrasound**

**Price €170**

## PREVENTION OF SLEEP DISORDERS

At our center it is possible to perform the Polysomnography test, a test to diagnose sleep disorders and improve rest.

Checking: The regularity of breathing, the heartbeat and the change of position (highlighting the phases of apnea and their duration).

**Watch PAT extension** is the innovative wrist device, approved by the FDA and CE marked, for the diagnosis of sleep breathing disorders (OSA). It is a small, wrist-mounted device

which allows you to carry out the examination in your own home and in full comfort.

### SCREENING WITH WATCHPAT:

**Inclusive tool of the final visit with our pulmonologist specialist.**

**Price €300**

### ORTHOPEDICS/TRAUMATOLOGY:

For the evaluation of possible trauma and fractures. At our center you can:

### ORTHOPEDICS SCREENING 1 :

• **Specialist orthopedic visit**  
+ **MRI of a joint segment Price €160**

### ORTHOPEDICS SCREENING 2 :

• **Specialist orthopedic visit**  
+ **MRI of the cervical or lumbar spine Price €190**

## \_ WITHDRAWAL AND RADIOLOGY HOME

### WITHDRAWAL AND RADIOLOGY AT HOME

#### COVID-19 TESTS

Our center offers the possibility of carrying out samples and radiological examinations at home

**IN ALL AREAS OF ROME** every day from

Monday to Friday

from 8:00 to 20:00;

Saturday and Sunday from

8:00 to 13:00

For information and appointments call:

06/66000543

335 7211096 (Home sampling) 392

049 1482 (Home radiology)

Head of home collection service: Mr.

Romina Peloso

Home Radiology Service Manager: Mr.

Daniele Costantini

## \_PARTNERSHIP

Monzino is a scientific hospitalization and treatment institute with a great specialization: the heart and its vessels. It is part of the IEO-Monzino group: two excellences in the major pathologies of the western world, which reinvest all their profits in Research and Innovation.

The Monzino Cardiological Center was born in 1981 from a donation from the Cav.dellavoro Dr. Italo Monzino and from the original idea of Prof. Cesare Bartorelli, of the University of Milan, who thought of creating the first hospital in Europe dedicated exclusively to the treatment of cardiovascular diseases. Today it is part of the IEO-Monzino group: two excellences in the major pathologies of the western world, which reinvest all their profits in Research and Innovation.

Monzino is accredited and has an agreement with the Lombardy Region and offers hospitalization and outpatient services under the National Health Service (SSN).

In 1992, it became the first Scientific Hospitalization and Care Institute (IRCCS) in Italy with an exclusive cardiovascular vocation. As IRCCS, Monzino pursues research purposes, mainly clinical and translational, in the biomedical field and in the organization and management of health services, together with hospitalization services and highly specialized treatment for cardiovascular pathologies.

European Institute of Oncology (IEO) was born from an idea of Umberto Veronesi and was inaugurated in May 1994; two years later it became an Institute for Scientific Hospitalization and Care (IRCCS). External IEOs The European Institute of Oncology, a Scientific Hospitalization and Treatment Institute, is a "comprehensive cancer centre", with a "non-profit" purpose, active in three areas: Clinical, Research and Training.

The IEO aims to achieve excellence in the field of cancer prevention, diagnosis and treatment through the development of clinical scientific research and organizational and management innovation in a context of constant attention to the quality of the service provided to the assisted persons. The values and principles that inspire and guide the operators of the Institute are:

- Centrality of the assisted person
- Continuous improvement of the quality of care
- Service excellence
- Multidisciplinary approach to clinical aspects
- Development of experimental research with rapid transfer to patients
- Enhancement of human resources
- European spirit and openness to international collaborations

## OPENING HOURS

### OF THE OUTPATIENT CLINIC

#### AND RADIOLOGY:

FROM MONDAY TO SATURDAY  
FROM 7:00 TO 20:00 (CONTINUED  
HOURS)

SATURDAY

FROM 7:00 AM TO 6:00 PM

SUNDAY

FROM 8:00 TO 12:00
